75 Years Of Innovation In Power Solutions

Die Lindenberg-Anlagen GmbH in Overath, NRW

Sales Engineer To strengthen our EPG sales activities (m/f/d)

Powerful – Lindenberg-Anlagen GmbH

The excellent name of our company with its 100 employees is based on our sophisticated and modern power systems and our reliable service.

Our products for the EPG market cover solutions from 100 kWe up to 10 MWe. As an expert in customer-specific applications for 75 years, we are also part of the energy transition in decentralized energy generation through to energy-efficient and environmentally friendly energy solutions. From ESS Micro Grid system solutions to hydrogen-powered power generators, our products and solutions are part of this change.

To expand our sales activities, we are looking for an application engineer who enjoys supporting our customers and partners at the forefront by advising on customer-specific energy solutions.

Tasks

- Development of customer-specific Energy Solution Systems (ESS)
- Concept development for solutions and cost calculation
- Technical support for our global partners
- Teamwork in our marketing and sales tools
- Technical project planning and management of our order processing
- Product management and definition

Qualification

- Completed bachelor's or master's degree:
- GenSet and internal combustion engines diesel & gas
- Electricity generating plants
- Electrical power distribution
- Commercial knowledge and experience (contract, commercial calculation, risk assessment)

Experience in:

- Maintenance of GenSet or power generation systems
- Technical management of ship operations or power plants
- Project management
- System design for marine/stationary power generation systems

Languages

- English
- German

75 Years of Innovation That Matters

The power and energy industry has relied on Lindenberg's robust technologies for decades for the most demanding applications, such as critical power generation, gas compression, harsh environmental power generation and efficient marine power applications.

Today, Lindenberg-anlagen offers a broad portfolio of industry-leading products including modular container power supplies, generator sets, hybrid power systems for maritime and stationary applications, energy storage, gearboxes, pumps and system integration solutions.

Lindenberg-anlagen's ESS division provides superior products and service solutions to increase our customers' efficiency and reduce total cost of ownership. We provide engineered energy solutions, asset repairs and certification, mechanical and rotating equipment repairs and upgrades, spare parts rapid prototyping, robust asset management, operations and maintenance, and on-site technical services worldwide.

We offer a wide range of career opportunities in a variety of technical and business roles across our global engineering and service locations. Join our team and help develop technical solutions that are changing the industry.
