75 Years Of Innovation In Power Solutions

Die Lindenberg-Anlagen GmbH in Overath, Germany

Technical Sales Engineer To strengthen our marine sales activities (m/f/d)

Powerful – Lindenberg-Anlagen GmbH

The excellent name of our company with its 100 employees is based on our sophisticated and modern marine power solution systems and our reliable service.

Our marine products cover solutions from 100 kWe up to 5 MWe. As an expert in customer-specific applications for 75 years, we are also part of the energy transition in shipping through to energy-efficient and environmentally friendly energy solutions. From hybrid diesel-electric system solutions to hydrogen-powered marine gensets, our products and solutions are part of this change.

To expand our sales activities, we are looking for an application engineer who enjoys supporting our customers and partners on the front lines with advice on maritime energy solutions.

Tasks

- Development of customized maritime power generation systems
- Concept development for solutions and cost calculation
- Technical support for our global partners
- Teamwork in our marketing and sales tools
- Technical project planning and management of our order processing
- Product management and definition

Qualification

Completed bachelor's or master's degree:

- GenSet and internal combustion engines diesel & gas
- Electricity generation in shipping
- Electrical power distribution
- Commercial knowledge and experience (contract, commercial calculation, risk assessment)

Experience in:

- Maintenance of GenSet or power generation systems
- Technical management of ship operations
- Project management
- System design for marine/stationary power generation systems

Languages

- English
- German

75 Years of Innovation That Matters

The power and energy industry has relied on Lindenberg's robust technologies for decades for the most demanding applications, such as critical power generation, gas compression, harsh environmental power generation and efficient marine power applications.

Today, Lindenberg-anlagen offers a broad portfolio of industry-leading products including modular container power supplies, generator sets, hybrid power systems for maritime and stationary applications, energy storage, gearboxes, pumps and system integration solutions.

Lindenberg-anlagen's ESS division provides superior products and service solutions to increase our customers' efficiency and reduce total cost of ownership. We provide engineered energy solutions, asset repairs and certification, mechanical and rotating equipment repairs and upgrades, spare parts rapid prototyping, robust asset management, operations and maintenance, and on-site technical services worldwide.

We offer a wide range of career opportunities in a variety of technical and business roles across our global engineering and service locations. Join our team and help develop technical solutions that are changing the industry.
